OIL THE BEST MEANS TO KILL MOSQUITOES

Least Expense and Most Ef- Cup Defender Will Soon Be Offi- Government to Become Member of Commencement Exercises Close lant; continued by J. H. Gordon for apfective Method.

RECOGNIZED EXPERT'S VIEWS

Kills the Insects But the Eggs Placed There by Them.

what it is talking about," said Dr. L. ed out by the Bristol yacht builders. O. Howard, chief of the bureau of entoin the course of an interview recently. these insects disseminate malaria and kindred diseases, but they may be killed under the Brooklyn Bridge. by covering pools in the infected districts with a film of oil. Every medica! triets with a film of oil. Every medical VIRGINIA NOT EAGER man should be familiar with the results of these experiments.

"Oil operates in this way: Mosquitoes often remain under water for a long while, coming to the surface from time to time to breathe. They draw in Representative Hay Says His People the air through a long, slender tube at the caudal extremity of the body. If oil be spread on the top of the water ; has the peculiar effect of clogging this tube and suffocating the insect. Then, too, the female places hundreds of eggs on the surface of stagnant pools to be hatched. The oil not only kills these but the female mosquito as well, catching her after the manner of a fly on sticking paper.

Whitney's Mosquito Dinner.

"I have returned but lately from Mr. Whitney's whimsical but enjoyable 'mosquito dinner.' I wish all who atwhat Mr. Whitney has accomplished in country house was literally infested with the insect, so that it was very un- the delegation, which will give him all pleasant to cross them. Today he has driven off every mosquito in the neigh-

"It is clear that the army surgeons of the country appreciate the value of oil. They spend no time in considering the advisability of using it. I believe it is employed, and with excellent effect, at ery army post in the country which is at all troubled with the pest.

"Drainage is without doubt the most effective means of destroying the mosquito known to science. Circumstances, however, often make it impossible of application. Suppose you have a cistern which you wish to preserve and from American charity. All relief dis-which is a hot-bed of mosquitoes. To tribution is through hands of American drain the cistern would, of course, out of the question, whereas oil could be used very readily. Again stagnant pools, periedically renewed by rain, are found on many varant lots in and about the city. It would be too costly to drain off this water after every shower, but a film of oil could be kept upon them at a merely nominal outlay.

Sewers Are Breeding Places.

"Though it is not generally known, sewers are one of the most fruitful sources of mosquito production in cities. whether you consider the sewer proper or the manhole let into the main pipe. Drainage is impracticable here and heavy rains do not occur often enough to keep the sewers flushed. The largest hasn't a surface over three feet in diamleter, and a couple of ounces of oil, renewed every few weeks, would be ample

are only a few which occur to me at present. Ten thousand dollars was placed

therity on mosquitoes, and, in fact, on all insects. The results of his exhaustive study of the pest and the best means of stamping it out appear in one of his books. This volume is entitled 'Mesquitoes," and is written in a style which will interest laymen as well as thysicians.

FOOD WON

In a Case of Appendicitis.

Food cured a well-known Kansas chool teacher of appendicitis. "A year ago last July I was taken sick with appendicitis and was operated upon, being down in bed for nine weeks, and although I was given up to die by the doctor and the entire community I got up again and went back to work al-though a wreck. About the middle of last February I was taken sick the same way but went to Eureka Springs and stayed for five months, ill all the time and just about half alive.

"It was about this time I received a letter from an aunt in Nebraska telling me of what a food called Grape-Nuts had done for her and asking me to try it. I did so and in a short time Grape-Nuts had done me more good than all of the treatments put together. My case is spoken of as one of the most interesting in Kansas, for I spent over \$1,000 for medical treatment and finally had to fall back on food and am now getting along far better than I have before for several years. I am recuperating rapidly and getting strong and healthy again. My stowach and basely healthy again. My stomach and bowels are normal and on the whole I feel like

I studied dietetics in my work as school teacher, but never knew before that the power of pure scientific food could be so great. I recommend of permitted by the self-by school of the largest great by Postum Co., Battle Oreck, Mich.

Weak intestinal disestion causes and the largest gatherings of colored people had in that community for a long ple had in that community for a long.

Weak intestinal digestion causes appendicitis when much white bread, potatoes, or partly cooked starchy cereals are used. Grape-Nuts food will prevent such troubles because the starchy part of the cereals has been already changed and predigested in Grape-Nuts, there-fore there is no overtaxing of the organs and no fermented food to cause

not something new for dessertsomething out of the ordinary! See recipe book in the package of Grape-Nuts.

HEARING ON APPEAL OF CONVICTED MURDERER

Case of B. G. Hill to Be Taken Up Tomorrow in Court of Appeals.

Arguments will be heard in the Court of Appeals tomorrow on the appeal of ment Hospital for the Insane were held Benjamin G. Hill, under sentence to be hanged in the District jail June 26, for the murder of his wife.

At his trial Hill did not testify in his own behalf. His counsel made insanity a plea of defense.

After conviction, when Hill was called before Justice Anderson to be sentenced, school, presided. he asked that he be allowed a few days to prepare and present a statement of his case to the court. The request was granted, and the week following Hill appeared and read a paper, in which he said that he loved his wife, and that he had no recollection whatever of having shot her.
